

Number Line Subtraction

Thank you so much for visiting [Mama Jenn](#) and downloading the **Number Line Subtraction** game. The game provides a fun way to reinforce and practice basic subtraction and counting skills.

Materials Needed:

- 1) A die labeled with -1, -2, & -3 each on two sides (We prefer to use either our [Education Cubes](#) or our [Write-On Wipe-Off Dice](#))
- 2) Counters (anything that can be used to move along the game board)
- 3) The Number Line Subtraction game board included in this file ([Laminate](#) for durability)

Directions: Each player puts their counter at the **end** of the number line. The players take turns rolling the die/cube and moving their counter along the number line by moving backwards by the number rolled on the die/cube. If a player lands in the same box as another player, the other player goes back to end of the number line. The first player to land on 0 wins! However, if the player goes past the 0, they must go back to end of the number line.

FYI, the board is designed so that you can play to 10. However, you can extend the board to as much as 100 by simply taping the number lines together. For detailed instructions on how to set up the board and play the game, visit the webpage that hosts these files (which is listed below).

Terms of Use: Please feel free to print this pdf file for your own personal use.

However, I ask that you abide by my [terms of use](#). The files are created for private and non-profit use.

Please do not sell or host these files anywhere else. If you would like to share these files with others, please **DO NOT** direct them to this PDF file (the page you are at right now).

Rather, direct them to the [webpage](#) that hosts these files...Here's the link:
